Putting it all together

(703) 937-7129

Jeffrey Kurt is our Lead Design Engineer.

Mr. Kurt has 35 years of experience in fiber optic cable system design, manufacture, and test. He has led Design Build Test Teams dealing with trans-oceanic communications, sea plow and other tether cables, and Remotely Operated Vehicle (ROV) cables and their associated grips, terminations, and connectors.

He has also led the design of specialty fiber-optic cables including pack-wound small cables, aerial cables, and radiation-hardened cables for the space station.

Jeff is the author of the Bell Labs, *Fiber-Optic Ocean Cable Design Handbook* and is recognized worldwide as an underwater fiber-optic cable subject matter expert.
